1. Nature of operations

GPM Metals Inc. (the "Company" or "GPM") was incorporated under the Alberta Business Corporation Act on March 16, 1994 under the name of Minera Sierra Madre Inc. Effective December 15, 1999, the Company changed its name to MSA Capital Corp. and, subsequently, on October 28, 2002, changed its name to Coronation Minerals Inc. On April 5, 2004, the Company filed articles of continuance and was continued under the Business Corporations Act (Ontario). On August 17, 2009, the Company announced that it had filed articles of amendment to change its name to Guyana Precious Metals Inc. Effective August 27, 2013, the Company changed its name to GPM Metals Inc. The primary office is located at 141 Adelaide Street West, Suite 1101, Toronto, Ontario, M5H 3L5.

The Company is a development stage entity that does not generate operating revenues and has limited financial resources. The Company is subject to risks and challenges similar to companies in a comparable stage of development. These risks include the availability of capital and risks inherent in the mining industry related to development, exploration and operations as well as global economic and commodity price volatility. The underlying value of the Company's mineral properties are entirely dependent on the Company's ability to obtain the necessary permits to operate and secure the required financing to complete development of and establish future profitable production from its mineral assets, or the proceeds from the disposition of its mineral properties.

These unaudited condensed interim consolidated financial statements have been prepared using International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board on a going concern basis, which assumes the Company will be able to meet its obligations and continue its operations for the next twelve months from September 30, 2017. At September 30, 2017, the Company had not yet achieved profitable operations, had an accumulated deficit of $37.8 million since inception (September 30, 2016, $35.0 million) and expects to incur further losses in the development of its business. To continue the Company will need to raise funds as it does not have the cash nor cash flow to continue for the next twelve months.

The Company's ability to continue as a going concern is dependent upon its ability to obtain the necessary financing to meet its ongoing corporate overhead expenditures as well as advance the exploration of its claims and development of its projects. Cash was raised in a non-brokered private placement in May 2016. Although the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to do so in the future or that such arrangements will be on terms advantageous to the Company. These material uncertainties cast significant doubt upon the Company's ability to realize its assets and discharge its liabilities in the normal course of business and, accordingly, the appropriateness of the use of accounting principles applicable to a going concern.

These consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary if the Company were unable to realize its assets and settle it liabilities as a going concern in the normal course of operations. Such adjustments could be material.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements, unregistered claims, aboriginal claims and noncompliance with regulatory and environmental requirements.

2. Significant accounting policies

(a) Statement of compliance

These unaudited consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting. Accordingly, they do not include all the information required for full annual financial statements required by IFRS as issued by the International Accounting Standards Board ("IASB").

The policies applied in these unaudited consolidated interim financial statements are based on IFRS issued and

effective as of November 27, 2017 the date the Board of Directors approved the statements.

(b) New Accounting Pronouncements not yet adopted

IFRS 9 – Financial Instruments IFRS 9 was issued in final form in July 2014 by the IASB and will replace IAS 39 - Financial Instruments: Recognition and Measurement. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 also includes requirements relating to a new hedge accounting model, which represents a substantial overhaul of hedge accounting which will allow entities to better reflect their risk management activities in the financial statements. The most significant improvements apply to those that hedge non-financial risk, and so these improvements are expected to be of interest to non-financial institutions. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. The Company hs evaluated the standard and has concluded that the application of IFRS 9 will not have a material impact on its consolidated financial statements.

IFRS 15 – Revenue Recognition – The International Accounting Standards Board ("IASB") has issued a new standard for the recognition of revenue, IFRS 15 – Revenue from Contracts. This standard will replace IAS 18 which covers contracts for goods and services and IAS 11 which covers construction contracts. The new standard is based on the principle that revenue is recognized when control of a good or service transfers to a customer, so the notion of control replaces the existing notion of risks and rewards. The standard permits a modified retrospective approach for the adoption. Under this approach, entities recognize transitional adjustments in retained earnings on the date of initial applications (i.e. January 1, 2018), without restating the comparative period. Entities will only need to apply the new rules to contracts that are not completed as of the date of initial application. The standard is effective for annual reporting periods beginning on or after January 1, 2018. Early adoption is permitted. The Company has evaluated the standard and has concluded that the application of IFRS 15 will not have a material impact on its consolidated financial statements.

IFRS 16 – Leases – In January 2016, the IASB issued IFRS 16 – Leases which establishes the principles that an entity should use to determine the recognition, measurement, presentation and disclosure of leases for both parties to a contract: the customer ('lessee") and the supplier ("lessor"). IFRS 16 replaces the previous leases Standard, IAS 17, and related interpretations. IFRS 16 is effective from January 1, 2019 though a company can choose to apply IFRS 16 before that date but only in conjunction with IFRS Revenue from Contracts with Customers. The Company is currently assessing the impact of this standard.
